

This is the Story of 25 years of Making of INDIA Redefined which aims to make more Doers than Beneficiaries.

- Why Visionary of this Movement Anurag Kanti, thought about this kind of Movement where people can give ISR- Individual Social Responsibilities 20 years back but took so long and why this **Best Humanitarian Initiative 2009 award winner INDIA Redefined**, finally started in 2009?
- Why Ranjana Kanti was made Face of Common People in this **Non Political Citizens Empowerment Movement?**

All over world the Government Sector, Corporate Sector, NGO Sector are working but is trying to bring the Fourth Sector "The Common People" working for the betterment of not only INDIA, but to make this Planet Earth a better place to live in on one platform in masses across the globe. **Our Stakeholders include us - the Citizens of India.**

Common people till now have only come together if they are against something; e.g All Independence movements, Movements against corruption. They have never come on one platform to work positively for country and then empowering themselves.

Why Anurag Kanti , the Visionary of this Movement made Ranjana Kanti The Face of INDIA Redefined ?

Visionary of this Movement Anurag Kanti, thought about this kind of Movement where people can give **ISR- Individual Social Responsibilities** 20 years back-but since all these years he could not know any other common person, so closely as Ranjana Kanti, whom he had seen everyday changing lives of few people and tried to make that person more than Beneficiaries another Doer, without any platform, without any support, without any donation, without forming any NGO, without any extra resources, intelligence , without using any Rotary or Lioness. or without any special qualities, without calling herself a social worker within her resources and available time .There is a long list of activities of Ranjana Kanti, here are few:

From free tuition to children of illiterate parents, awareness program.In slums, working for visually handicapped, teaching children of migrant Workers, street children, helping riot affected people are some of the Activities I have been involved in. Represented economically weak Parents In school for fee concession, Organized Programs of communal harmony, Free computer literacy for senior citizens in my institute, helped set up Training and later business for economically deprived housewives in Stitching, helped them in setting up many small scale business of spices, Embroidery etc, Awareness programs in slums for vaccination, cleaning, Hygiene, initiated vermin culture projects, garbage segregation, Conducted campaigns for environment conservation, coordinated with NMMC for relocation of street hawkers, organized various programs in Municipal schools, street plays on population, anti plastic, corruption etc. For last 4 years I have been training economically weak youths in Graphics & animation through E-edutainment Unlimited & home. On an Average, every quarter 5-10 such youths are trained for free, and then Placed into jobs.

All these activities were done by Ranjana without forming any NGO, without any funding, but for some of above initiatives many people volunteered themselves.

Anurag always asked many Intellectuals ?

- ❖ Do we want to make this Globe better?
- ❖ Are we Fed up of table talks with no action?
- ❖ Are we willing to do our bit for the country?
- ❖ Are we Confused how to do this?

Anurag Kanti shared this idea of starting a movement for common people, by common people, and of common people. with Many Intellectuals and Entrepreneurs who are associated with many leading organizations and who kept adding to the vision of INDIA Redefined, for which INDIA Redefined is greatly indebted .

INDIA Redefined is a platform for people from different Diversity, backgrounds, different social class, having different outlooks and Opinions to come together and work towards redefining India.

That is why INDIA Redefine's vision is created by an amalgamation of

Different visions that ultimately leads to a HAPPY INDIA.

Everyone thought of making some common person face INDIA Redefined.

Anurag always thought

What you require to "Redefine India"

*Love for "India
Passion to be the "Catalyst" of change
Belief in your "Actions"
Trust in others to become as "Committed"
Action to "Change" - yourself and others around you*

People from all strata from different backgrounds, different religion, from different social class, having different outlooks and opinions, even from different countries have supported this idea of redefining India.

All these intellectuals were convinced that Ranjana Kanti who already has above qualities can become a Force Multiplier for common people.

And finally in 2009, in spite of Ranjana saying no for this proposal initially, they all convinced her to become Face of INDIA Redefined.

This article motivated many from what Visionary says
On... Likeminded people..... and comfort zones

Please read this Idea worth Spreading which has inspired Many Citizens to put their ISR- Individual Social Responsibility on this platform of INDIA Redefined:

Everywhere we all talk of problems in India - but do little.

Part of the reason is that we think that solving these are the government, Politicians, bureaucracy, economists or NGO's, Corporate or Social Worker's responsibility - not ours.

But shy away from even talking about our responsibilities as a citizen of the country. Many of us do not

Even bother to vote and then criticize the people who are elected on vote Bank politics.

This INERTIA is the root cause of many of our problems and we are partly to Be blamed.

We have left governance to people, who are not really our representative, Policy to people who do not feel they are accountable to us, we have left environment, slum, and literacy to NGOs, Social Workers who struggle without our support.

- The list can go on and on...

So came the idea of INDIA REDEFINED

- A movement to create responsible and empowered citizens by bringing About "Behavioral Change".

It is only when we do our duties we shall be empowered to demand our Rights.

It is by this change in behavior that we can unlock people's potential to be Empowered citizens.

This will redefine how we think and act as an Indian.

.....and that is what INDIA Redefined is about.

So, what is the Vision of INDIA Redefined? It is simply -

CREATING A HAPPY INDIA

And how can we create a Happy India?

Most of the ordinary people want to do something for the Country, they just don't know how.

The idea is to mobilize these masses and bring them together.

How does INDIA Redefined do it?

By giving a structure to this... 'Desire to do something'.

By creating an opportunity for them, to achieve small successes in doing Something for the society

... Something within his resources and available time

- Be it planting trees or cutting down the electricity consumption - a simple

Successful activity, that would not only be beneficial at a larger scale but

Also provide the motivation to strive for bigger changes.

Developing this behavioral change across Indians of all strata, INDIA Redefined plans to tackle problems, leveraging the power of individual.

It is a citizen's empowerment movement - a platform for ordinary citizens

By ordinary citizens - each fulfilling his own ISR - Individual Social Responsibility.

What makes this movement unique or even different?

Well, there are many wonderful organizations, NGO, Charities, and People which do a Lot of wonderful work -

But it never seems to be enough.

Most of them work within a context or for a specific cause, that the overall Positive effect Is lost in the gaps.

One of the biggest reasons is that we have not tapped efficiently into the Potential of the individual.

INDIA Redefined is a platform for people from different Diversity, backgrounds, different social class, having different outlooks and Opinions to come together and work towards redefining India.

That is why INDIA Redefine's vision is created by an amalgamation of

Different visions that ultimately leads to a HAPPY INDIA.

It is important to understand that we are not affiliated with a single political Party or motive.

But do not hesitate to work with any and every political party, business Houses or NGO for the right cause.

By bringing drops of people together on a common platform INDIA Redefined creates an ocean -

Ocean strong enough to make government, politicians, public servants not only accountable but also make each Indian an Awakened Citizen...

People appreciated the movement from all over World and there are many supporters from All Strata of life, from all over India, NRIs, from other Countries, People of different Nationalities too.

This shows that there are people out there who want to 'do Something'...Make a difference.

All they need is the platform.

The idea has not only got support of people but also some recognition

- It was adjudged "The Best Humanitarian Initiative" in December 2009

In this long journey of redefining India, we have taken only a few baby steps

But then again, a journey of thousand miles begins with a single step...

This idea.... Idea of a movement that is trying to tackle most, if not all, social Issues and help citizens become empowered by the means of behavioral

Change, asks you for only one thing

- DONATION.

Not of MONEY.

But Donate Your TIME.

STAGES OF INDIA Redefined:

AWAKEN INDIA - By bringing about AWARENESS, EDUCATION & COMMUNICATION

CLEAN INDIA - Of CORRUPTION, POLLUTION, UNHYGIENIC CONDITIONS, DIRTY ENVIRONMENT,
CONTAMINATED WATER & SOIL - (ANYTHING REQUIRING CLEANSING)

GREEN INDIA - RESULT OF CLEAN INDIA and using SUSTAINABLE METHODS OF GREENING OF INDIA,
EMISSION REDUCTION & REDUCING EFFECTS OF CLIMATE CHANGE

HEALTHY INDIA - WILL RESULT FROM CLEAN INDIA and dedicating SPECIFIC
FOCUS ON HEALTH ISSUES

PROSPEROUS INDIA - The above INITIATIVES WILL NATURALLY LEAD
TO PROSPERITY ACROSS BOARD

HAPPY INDIA - END RESULT OF ALL INITIATIVES (it may
be UTOPIAN) but SOMETHING TO STRIVE FOR

INDIA Redefined Pledge

I, a citizen of INDIA, take the pledge to Carry out my responsibilities toward the country and the society and stand for my rights. As a member of INDIA Redefined movement

I shall work within my available resources and time to awaken other citizens of India and create an Educated, Healthy, Green and Sustainable country to have a Prosperous and Happy India for ourselves and the future generations.

Personal Note from Ranjana Kanti - India Redefined, Social Change & Beyond 'Me'

I am Ranjana Kanti and was involved with three of my husband's companies - E-dutainment Unlimited, Clay n' Color Communications & Redstreet Productions. But this is not my introduction today. I will, today be talking about an initiative which I hope can help change our society and the country or may be this Globe for better i.e. India Redefined.

In 2009 as soon as INDIA Redefined started thousands of people started joining the movement -I only told them one thing - we all have grown up listening and reading the stories of great men and women like Jesus, Gandhi, Lakshmi Bai, Bhagat Singh, Ram, Allah, Guru Nanak, APJ Abdul Kalam, but their stories are not related to their personal life what inspires us but their story related to their country or society. So when will you make your own story related to your country or society, which you can tell others or others read about you and many of them started putting their ISR and this movement started happening.

I started believing this must a part of Anurag Kanti's vision to make me and many like me who can be force multipliers, without any support or platform or organization or groups or NGOs.

Movement Started in 2009, & we made Coordinators. Last year I selected 92 Coordinators but I am an expert in selecting 80% wrong people. Only work given to them was " I Care" Project as activities were simple, and many did those successfully within resources and available time. INDIA Redefined target was to get more hands and more brains from common people whom till now any organization, activists social workers beneficiary not doers

There are many things written about me, many newspaper's exaggeration ,even in US magazines, some unknown TV channel interviews, photographs in even local newspaper with unknown names, will harm the movement if any single person sees it and thinks I am a celebrity. I am just a telephone operator or coordinator.

Credit to bring INDIA Redefined to this level goes to all the Supporters of INDIA Redefined across globe. I have just accepted any award on behalf of all the present and future members of India Re-Defined! These are the people who care deeply for India! People whose love for India is beyond measurement! People who want to move India forward! People who want an India which they can really be proud of!

But these people are not waiting for a miracle to happen! They are not day dreaming! They know that to change India, they have to step up! They realize that they need a movement! A grass roots movement! A social movement which is more about awareness, responsibility and ownership by all of them. They know, that they are many pressing social issues which need to be addressed! They also know that many of you have done wonderful job in addressing many issues! But they know that it is still not enough! They have to work with all of you to make an impact!

In our life most of our activities revolve around doing something for ourselves. Though some of us try to go beyond that and do something for other causes where there is no direct benefit to us. However nowadays, the term usually refers to the act of generosity associated with donating money, goods, services, time, and effort to support a socially beneficial cause. One thing I do believe is that Philanthropy should be about having "NET POSITIVE" effect rather than offsetting any NEGATIVE happening. For example - a Company trying to offset their Carbon Footprint is not a 'philanthropic act' as they are 'just cleaning their mess'.

I am taking myself as a case study, and I am sure many will identify with it. People describe me as a social entrepreneur, activist, leader and even Social Reformer now....

I call myself just an ordinary Indian citizen who did her bit, more as a Common citizen of India.. This contribution was not even equal to drop in an ocean. I have worked for various social causes independently and through organizations.

What is it that shaped me to become who I am today?

Well I had a dream and I was just 7-8 years old. There were many words to describe me-as talkative, friendly, independent, still emotional, and sometimes artistic. I wouldn't hesitate to agree with each descriptive word, except one thing which they could not see, that my interests were much beyond my friends, family, school, home. They perhaps ignored my inquisitiveness - Why did it matter to me to see my house hold helper Kamala in a torn saree, eating leftovers, why her children took the cloths rejected by us? Why did they admire the toys which I left playing years back? On the top of that two of her children much older than me, were still studying in such junior classes, had limited knowledge and could not read my books. As a curious person, I wanted to know more and more about their lives and found that they don't have the basic things needed, and things which we call necessities in lives, are luxuries for them. Many times, my mother started finding me a careless person, who loses eraser, pencils, books whereas I gave these to Kamla's children.

I was 8 - perhaps in 3rd std., a very skinny girl, but people used to find a bright face - but with no interest in food. Every lunch break was a struggle for me to finish my Tiffin. It was easier to share with friends, but then I found a small boy always sitting near school gate in during lunch break, eating a dry chapatti with some white thing, salt I guess now. So many times, he had nothing to eat. I started giving my food to him. He was earlier reluctant to take food from me, but even at that time also it was very easy for me to make friends. He started taking my Tiffin, and was happy to show an empty Tiffin box to my mother at home. A win-win for both .. I started taking interest in his Home-work. He was living in nearby slum and my school peon was his neighbor, who brought him to make him study in English medium school. At the age of 8-9, I could not understand why there is no English teaching in the school, where his neighborhood children went. He called it municipal (sarkari) school. I was wondering - why no English? - How do they study Maths and Social Studies then? I wanted to ask our English teacher - why doesn't she go in the evenings in these sarkari schools to teach? Giving Tiffin to that small boy, when I look back, it was more out of convenience (of not having to finish the food) than out of altruism. But seeing him eat over time, made me realize that there so many things that I wasted or did not want while someone out there NEEDED it. Moreover, if I could even take out a small portion of anything I need too and gave it someone or even shared it, I could bring HAPPINESS - to that person and to myself also. And Happiness is infectious.

Once, I got a chance to go to my house-helper Kamla's slum Basti, along with my mom, to call her on a Sunday evening as some unexpected guests had come. That was the time, I saw this part of India so closely. (A glimpse of this I had seen when I used to travel by train from Delhi to my native place, On the way you see such houses, or children without clothes, people using track as their toilet seat. But that time it was all fun for me. One scene after another, train runs so fast that you don't get time to think about previous scene) But that day when I was nine and half ,standing in Kamla's slum, seeing the life of a person who keeps our house so clean, I was just more than shocked. I had never seen such filthy atmosphere. Don't know why, but was little angry on Kamala, and more than her on my Mom. Why she did not show this part of India to me ever. Then I started analyzing - if all the neighborhood Aunties and my Mom together do something to make Kamla and her neighbors

live in a clean environment - why can't they - when they can scold Kamala or others who clean their houses for a little negligence of some "cleaning" part in our own house, they can take some interest in Kamla's house. And why this Kamala does not learn anything from my Mom? I came back home and asked my Mom all these questions - her answers did not satisfy me. According to her - the illiteracy, unemployment of Kamala's husband and others like them are the major reason for that. Mom was also talking about "Fate" & "The Government". I did not understand relevance of both the words. Who is the government? I had read in my social studies chapters - but that was all to answer the questions at the end of each chapter - Is that related to real life?

At the age of 15, I heard a story of a small 5 years old girl's sexual exploitation. Someone had discarded her body beside the highway. I was at loss of words. Felt such a pain for this small baby. I was not sure what emotions I had at that time. I felt like vomiting. This kind of thing has to end. I have the same determination today to help these victims. I wanted to channelize this strong urge to 'do something' which is one of the reason why I am here.

We all have seen lots of trauma in our lives. We have held hands with families who lost children, prayed with children who lost parents. I learnt about death by experiencing death of my mother in a road accident. I was then 25 years old and she must be 48. My experience in life is that when one is exposed to painful situations, we have to turn those experiences become useful and create positive things out of them. So what did I do when bad things happened to me? Social work as "Therapy" - for me these become connected. I just knew one thing - How can you say no to help someone else? How can you say no to help yourself? Every helper needs time to re-create and follow ones own advice. Everyone develops their own way to understand life. I chose to use the work the way I did. For me this was as exciting as making a film, or a talk show or attending a Party.

Helping others is our own opportunity. Many people are not fortunate to get such opportunities and many of them don't utilize these. Sometime ago, someone asked me "when was the first time you did some social work?"

I remember when I was 19 years old, 2nd year of my graduation studies, in one of the activities of NSS, where we had to visit hospitals to talk to patients, go to slums for awareness campaign, and to orphanages to play with those children. I was assigned one blind student, one year junior to me, in the same course of English literature which I was doing, to whom, I had to read reference books of literature, as Braille as printing was expensive. Not many books were there in Braille. This cause is still very close to my heart and I do a lot of things for this.

At the age of 9 or 10, my mom would not allow me to go to slums and do anything. But at 18 or 19, one gets that Freedom, when you start traveling alone, you are little independent to choose what you want to do, who your friends are - though, still one does not have the financial freedom. It was then that my strong urge to 'do something' combined with FREEDOM 'to do so' that culminated in a philanthropic act. Freedom is important. It made me realize that we all have urges and opinions but only when we get freedom we do something. In this context,

its not freedom from OPPRESSION but freedom from Priorities (day-today activities), freedom to take your own Decisions (e.g. that a child may not have that freedom), and Economic freedom (e.g. a freedom Bill Gate and Al Gore have).

But we all have certain level of freedom. For example - Both my sons who are 15 and 19 years old - they may not be not have economic freedom or freedom to take a decision to make a national policy on reducing Global warming, but they can plant trees, can try to make some underprivileged computer literate or volunteer or initiate youth movements.

When something is initiated alone out of raw passion outburst, frustration or anger, it tends to fizzle out. Passion or Anger is good and needed but cannot be the sole driver. It is like the spark-plug in car engine - something that gives the movement but you need petrol or diesel to run the car. You don't initially need to have an altruistic intention to do something philanthropic. Just do it for yourself. Why? We may initially do it for self-gratification but by doing it again and again, we shall find ourselves in a place where this self-gratification shall become irrelevant and the goodness that comes out of our action will become a motivator by itself.

Here, I will like to mention about PAIGAAM - an Indo-Pak Youth conference which was initially started as student's initiative by my son Anupriy and his friends in 2007 -2008 when he was in 11th and 12th Std in Dhirubhai Ambani International School, to make friends across the border. Now it is a full fledged Conflict Management movement done every year. Later on my younger son Anurit when he was in same school from 8th till 12th Std , was leading this movement Paigam.

Another experience in my life which made me suffer with guilt and confusion - I have been helping the children of illiterate parents for many years, who usually leave studies when after 8th 9th or 10th, as studies become difficult for them to cope up, to complete 10th, 12th, or graduation. I now realize that I had a great contribution in increasing the unemployment of India - One of my house helper Mukta Bai, in Mumbai had 4 children, whom I gave free tuitions for years, as after 8th 9th, three of them were going to leave studies to take up their fathers profession of white-washing and the daughter was going to help Mukta bai in her house helper's job in different houses to take up additional works and help her family in additional income. I was the one who helped them in getting a graduation degree. Now all of them are unemployed graduates, who don't want to take up their parent's profession, as there is no dignity of labor in India, and a degree without vocational training did not help them to get a dignified job. That is the time I realized that our education system is only helping us in making more and more people unemployed and creating migration of more and more people from rural to urban areas.

I was confused. What are we doing? What is happening? Does it mean -let them be illiterate?I got this answer much later when in the year 2002. I, who was a computer illiterate person at that time, got myself trained into animation, graphics and multimedia. I worked at several studios

including my husband's animation studio as animator, worked at various colleges as lecturer in animation and graphics and later chose Training as my profession.

Yes, I started realizing that very few people in India come to training in their own fields after they have Industry experience. Training in any field like medical or engineering also is a stepping stone before getting a job as a professional in Engineering. Any young student who comes, before taking the admission, for counseling in animation, if I ask him will he work as a faculty in animation after becoming Animator, invariably the answer is that he will only work in industry. I started training students in my husband's animation studio on live projects, by animators. With the money earned as the fees, I started utilizing it for slum youths who I used to bring in my studio for training in computers, graphics & animation - I was inspired by myself, one who was computer illiterate - now an animators and a known trainer in animation in several colleges. It was a struggle. But I was successful. Many such slum youths - who left studies, and could not afford to go to the known Animation Training Centers - 7th failed, 8th failed or 10th passed got trained by me and have been placed by me in the industry.

Success breeds motivation, to further work. I am now using this mantra in 'I CARE' project within the movement "India Redefined",- The point is to get people motivated by executing simple activities SUCUSSEFULLY. The key aspects in designing the activities are SIMPLICITY and HIGH SUCCESS RATIO.

Here I would like to mention - Concept of Personal Energy.

In my opinion, it is not enough to use one's economic freedom only. It is nice and generous for people to donate money, but that alone cannot be satisfying. There needs to be a sense of involvement. It does not mean that you need to spearhead every initiative, but do not make monetary contribution as an offset to the lack of participation. The message is to "Become Involved". So the purpose of "I CARE" project is to get people involved. Once that is achieved they will be ready to take up bigger challenges and issues which face us all. With time, I had started getting some recognition in local newspapers, magazines, even some TV channels, showed my work in news. But interest of media was not appropriate as some of the journalists, always wanted to know the family background of these slum youth. Many times, after some of my students started earning decent salary, as an animator or designer in industry, media persons asked them embarrassing questions like - whose mother was washing utensils and who was a ragpicker. I had to stop such interviews as I had never differentiated among my students. Still I could help many families to come to middle-class levels, who were below poverty line. In the process of identifying deserving slum youth, I met some education officers, under whom many municipal schools come, but in spite of requesting them to help me to find students who are interested to learn computers and graphics, they kept telling that all municipal schools do computer training, and one of the officer even showed me a receipt of 1000 computers which were supposedly placed in all municipal schools of the area. I then visited a number of municipal schools and after few days found that there are no computer and computer training anywhere. I started analyzing - why is this kind of thing happening - just because corrupt

bureaucrats are not accountable to ordinary citizens like us? But why will anyone be answerable to any other person - Just because it is written in our constitution that we all have Rights?

I may have done one thing at one time during all those years of our marriage before 2009 but Goodness coming out of it made me going on List kept increasing by each passing year , though I may not have done all the things alone and about things written about me, but certain things I tried to do and learnt with other experts or tried to be a small part of group who took initiatives and made better Doers though I should not get credit for everything.

I don't have any secretary or any office of INDIA Redefined, only one chair and one computer in a very small office of my husband's struggling business, where half the time I only try to teach children from rural areas of UP, Assam- giving them one room kholi with some utensils, mattresses, old cloths for those 3-6 months of training till the time they start earning. Earlier when before we closed down our animation studio with 22 people, I had 4 chairs and 4 comps. So every time after going to hundreds of houses, roaming around on roads, I used to bring 25 slums, or rag pickers, 5th -6th failed, then training them in English, the basic computers, then Graphic and animations for one full year or 6 months, Even though I had to pay fees of all those 25, but after training only 5 used to become designers animators- many of them earning well.

When a computer illiterate like me cud become multimedia professional, I started bringing hundreds of rag pickers and 6th failed slum boys girls graphic designing and animation, myself giving their fees by earning as designer working whole night When I helped a boy from Maharashtra village who was a construction worker boy, fell down from 8th floor -5 years back- broke legs, arms but when I brought him to my husband's small office where I used to get 4 computers ,4 chairs, and within those resources without any sponsors., that boy is not only teaching computers to villagers, those villagers cleaned their villages, took joining form from website, made many villagers . All printed forms he has sent to me, written in Marathi.

This year around 900 applications of senior IAS, DGP, Politicians and entrepreneurs from all over world came. I think only 10 % are worth it, because of enthusiasm they are showing. For me a person who calls himself a Common Citizen of INDIA, is more important and I think let others call you Great. So rest I have deleted. Don't have resources to spread the message to right people. Only selecting among the people who send CV with some vested hidden interest, I can't judge who is right and who are wrong.

Don't join or support this movement because you see huge number of supporters. If you join or support, don't be dependent on people whom I made a supporter, 90 percent of them don't listen to me , but support at their own will. This flexibility makes them admire INDIA Redefined.

You make your own team or soldiers or Army for INDIA Redefined I will only send you 3 lists of around 1255 members, 913 members and 169 members from all over INDIA or abroad. These people once in a while did some activities and showed active Interest.

In spite of huge support of people, I still feel sometimes alone again in this whole world, not having a single selection committee or Core Group and don't know who are right or wrong.

Many leaders or Anti Corruption Movements Unit the Citizens & this unity has to remain to become like a pressure group forever. These leaders have first built their credibility by doing their duties.

And even the followers of such leaders have yet to do their duty towards country, society and community at large. Hence the moral authority of such movements does not last long and is dependent on the leader's karma. First fulfill your duties and responsibilities, then you automatically have the moral authority to demand your rights and once it is done on a unified platform like INDIA Redefined nobody will be able to ignore your rights.

INDIA Redefined, needs Leaders with expertise and interest in specific areas to take charge of the initiatives under broad headings of Awaken India ,Clean India, Green India, Healthy India, Educate India.

Aspirants who want to be in INDIA Redefined Central Committee can send CV, photograph at ranjana.kanti@indiaredefined.org These are voluntary jobs. No Payment. INDIA Redefined Central Committee will have 16 All India Coordinators, 2 youth coordinators, 2 from INDIA Redefined Global Indians Group (GIG) , 4 National coordinators from some of the wings and 6 more -whose designation we have not decided ,among whom 2 at National and International level for Awareness Campaigns of INDIA Redefined, 2 responsible to bring the right people and tie up with the right organizations and 2 people for setting up processes- such as sorting CV, taking monthly reports from Coordinators . So basically each member of this team has a work profile .

Please read the work profiles of Coordinators as All India Coordinators, State Coordinators, City Coordinators, Village Coordinators, Chapter Coordinators, Global Indians Group (GIG) including NRIs Coordinators, INDIA Redefined International Coordinators of Friends of INDIA Redefined Group, INDIA Redefined National Coordinators of Friends of INDIA Redefined Group.

Work profiles are basically one year activities of any Coordinators.

.We only have few pics and don't have many pics or evidence as activities of initial Projects were just "I Care" and other projects like "Clean Green United Peaceful India"

India Redefined future Initiatives -"I Care for This Planet Earth" ,"Educate India", "Develop your own village", "Cure India" , "Youth Campaign-Clean, Green, United, Peaceful India". India Redefined may not achieve our expected level of perfection but some good things can happen.

Let perfection not be the enemy of good things.

We are not standing in parliament to find mistakes of each other like two political parties. It is a citizen's movement

I request you all to come on this common platform India Redefined.

Let us give the message of UNITY. Let us learn from History that Britishers could divide and rule us?

And now we THE CITIZENS have become like a vote bank because of differences between us in the name of states, religion etc.

The only identity required for it is being an Indian who wants to take the country to greater heights.

Leave behind your professional identity for once and come together and join hands as an Indian citizen and Redefine India in a manner you will want your country to become.

It is a citizen's initiative - by the citizens, for the citizens Please be with me in Redefining India. We are not affiliated to one single political party. We will get affiliated with all political parties. We have realized that to change the system, we have to be "n" the system. For it We will not work on political agenda or encourage it.

This will be a good opportunity for every political party to improve their image. We believe that every political party will want to work us. Don't they want India re-defined in a better way?

Let us all we move from the state of APATHY to SYMPATHY and Finally graduate to EMPATHY. Every Human being's pleasures And sorrows become our pleasures and sorrows, when anyone of Us is humiliated we feel ourselves humiliated, their aspirations Become our aspirations and their failures our failures what we Really require is the refinement of our basic sensitivity and Expansion of our self which is normally limited to our near and Dear ones. With these expansions we begin to identify ourselves With Nature in all its manifestations, humanity at large. Then and Only then the mother earth will be at Peace and worth living for all Of us. You may call this feeling Empathy or with some otherName. But to me, this state of Mind or Soul is something more Than the word "Empathy" or its equivalents connote. India Redefined will take this up.

For too long as citizens we have demanded our rights through numerous movements, always ignoring our duties.

If you are willing to mentor ten semi illiterate Indians about this Anti Corruption then JOIN INDIA Redefined www.indiaredefined.org C.U.R.E INDIA Campaign - Citizen United for Redefining & Empowering. "Ek Ka Dus" is the first Initiative of C.U.R.E. India Campaign. Make a difference in the lives of ten underprivileged Indians and let them become your follower.

I am trying my best to ask youths who are sending bulk mails to remove the email ids of those who are fed up of receiving INDIA Redefined mails.. But I think now it has multiplied to many more. Still many IT supporters are trying a way to do this.

So many social workers, NGOs, doctors, Policemen, Journalists Politicians benefits society but doctors do not produce more Doctors but does treatment of patients. Policemen, Journalists Politicians don't produce Policemen, Journalists Politicians but they all give something for society and country.

But INDIA Redefined supporters who may be a common man or a student or a villager or a beggar , the moment he / she does a small activity successfully and benefits in his/ her own way to someone, produces other doers.

Anurag always told me when I was refusing to make this as a movement with my name or pics coming anywhere, that you are not leader but face of common people.

INDIA Redefined helped two of our neighbors Pakistan and Bangladesh. We told them to copy everything from our website www.indiaredefined.org. See this link from Pakistan, they have written that they are inspired by INDIA Redefined.

<http://www.iownpakistan.com/2011/04/14/please-send-this-to-every-pakistani-who-wants-to-make-pakistan-a-happy-country/>

Last year, I helped a person to start this Pak Redefined who rang me up from Pakistan that there are 500 Pakistanis with u in India Redefined, whom I told to copy paste everything from our website, changing only one word India into Pakistan, but when you visit there blog -Pak Redefined- they have written - Inspired by India Redefined and Ranjana Kanti. I tried to find in Google last year has any Pakistani who call themselves enemy of India has written anything nice about India in these 60 years? Same thing happened in Bangladesh - one Entrepreneur from Bangladesh member of India Redefined.

On 3rd Oct , this year I was on the verge of going to Jail, while giving tribute to a sweet lady whose birthday used to be 3rd oct, met me once in life in a place called Bagalkot- Karnataka where I was from 1996 to 1997 but the day I was leaving I did not have a place like my house where so many slum ladies used to bring masala packets, saree falls, other stitching things , nice homemade sweets packets taught by me in clean atmosphere, and then directly going to shops or to customers from my place- as no one will give their precious sarees to slum areas or buy food from slums, this 3rd oct birthday lady gave one corner of her room for continuing this women empowerment without even knowing me.

This 3rd oct when a policeman caught me in wrong parking, -trying to celebrate birthday of 4 beggar children , giving tribute to this lady and having only 150 rupees in my pocket, to buy the cake for those who don't know their birthday by which I was supposed to give my son's vodafone bill- I told him to either put me in jail, or be the part of this birthday celebration and become the hero in front of full public - he talked to those 4-5 years old naked kids and when they and their beggar parents told him that I collected them for that only , that policeman who was going to put me in jail, saluted me broke certain laws, and offered me that he will celebrate their birthday, I can go away to pay my son's vodafone bill.

Anurag Kanti, who is a walking Encyclopedia, and by training is a Marine Engineer, left sailing 17 years back after he became Chief Engineer and with his college friend Jaidev Amirapu started an Animation studio and IT company, E-edutainment Unlimited www.edutainmentunlimited.com where both developed a software KRISTAL Vue which caters to Shipping Industry but now they are struggling to enter other Industries. They have another struggling business - a Production house Redstreet Productions, com making Films for Social Causes, Ad films, corporate www.redstreetproductions.com

First time I had heard the word "Bulk mailing "from a genius which they use for supporting great causes and business. I always tell INDIA Redefined youth to follow the right people not big people. My mail, LinkedIn, & my facebook profiles. I never use emails or LinkedIn for bulk mailing. I only reply to mails. Many youth, who few days back were very angry for me for designing all the pamphlets and T shirts or banners to support Anna Hazare and supporting his movement, just because I remove any youths from India Redefined youth coordinator ship in any state or university if they do any publicity on road, or bunk a single class or do bad in exams and they did not like whole world supporting Anna Hazare with media showing them all over world, and people not abusing Anna ji team for spam mails from the team, teaching rights to crores but duties to none.

Please help in Spreading about this Movement across India /Globe. Small media newspapers or channels http://www.indiaredefined.org/in_media.html may be writing about me or taking myinterview but any of you must have done more than what I have done.

INDIA Redefined still does not have any office or employees or funds, and only resource. All mails or messages about INDIA Redefined from my facebook accounts, mails, my LinkedIn messages are sent by many other supporters of INDIA Redefined Movement.

The movement was started to light up the fire in the hearts of very Indian citizen, to be awakened, to exercise their rights and fulfill their obligation & responsibilities. We Indians have so far silently watched the country go to the dogs and realized that the running of the country has been hijacked by people having vested interest. This movement is for those Indians want to change the country into something which they will be proud to hand over to their children tomorrow. As a growing movement, we plan to evolve as we come across challenges - each one of us is a leader of the country and its time we start acting as one. Before we Indians start demanding what government can do for us, we should start thinking what we can do for India. India can't be re-defined unless we understand the definition of a citizen! What does being a citizen of India really mean? Does it mean legal rights, voting rights, paying taxes, ability to stay forever and buying property etc.? Or "something more"? This "something more" is really a responsibility for a social and behavioral change. If every citizen defines this "something more" honestly in his or her mind then India can truly be re-defined. Citizen rights have been provided at the cost of some duties and obligations - these could be constitutional, social, civic or societal duties, that must be and should be performed by every citizen of India. People living in the typical social structure only know what their needs

are. So the first step of India Redefined is to help people to identify problems in their locality, take ownership of it and solve it. to appear)

Some broad NEEDS of India, as the movement sees - Awareness (which is Gaining knowledge), Education (or ability to Process knowledge) and Communication (that is, Spreading of knowledge). All NEEDS are complementary. What I mean by this is that it is not just enough to know the term 'Global Warming' but know the causes and consequences and spread that information by making others aware.

These NEEDS then combined with Motivation and smaller activities bring out BEHAVIOURAL CHANGE in oneself. If each of us have a behavioral change, we could solve problems like Corruption (Clean, Transparent & Good Governance), Hygiene (Good health and Sanitation), Pollution (Clean and Green Environment), and Human Relations (harmonious Relationship with each other and different communities). India Redefined is trying to be the enablers of this behavioral change! We must target the root causes - even if it is going to take longer. INDIA Redefined first " project Was "I Care "-the simplicity of activities which got people involved and successful completion of these motivated people for more focused activities for Redefining India.

Other upcoming projects of India Redefined are "Educate India" & "Develop your own Village". "Educate India" Many youth, studying in colleges are helping me to implement this. Students who are willing to be part of this movement will be taking the oath- "I donate" 6 months of my life in training or education, for those who are underprivileged." I got inspired by Wendy Kopp, founder of Teach for America. In India, education is supposed to be the great equalizer and the primary vehicle for upward mobility. But, the reality today is that all too often, where children are born determines their educational prospects. Across the country, largest number of children living in poverty have academic and, therefore, life prospects that are dramatically different than those of their peers in wealthier communities Mission is to build the movement to eliminate educational inequity (in terms of quality of education) by enlisting our nation's most promising future leaders in the effort. "I donate" will help in recruiting outstanding college graduates from all backgrounds and career interests to commit to teach for 6 months in urban and rural schools for underprivileged during or immediately after their student life.

Another project "Develop your own Village" was initially thought for Global Indians Group (GIG)v & NRIs, But many Indians living in Urban areas can take this up in future. People Majority of India lives in villages. Lack of opportunities is forcing people to migrate to urban areas. Unless we create opportunities for people in the villages, give them a reason to remain in villages and promote entrepreneurship and agricultural at village level, redefining of India will remain an urban phenomenon. We have to look at our own villages - develop these, educate the people there, create awareness and opportunities for the people of our own villages. If we make our roots strong - we shall make the country strong. We are working on creating a set of activities and small projects which anyone can take back to his village and with active involvement of the villagers there, can bring about positive changes, helping redefine India.

Let us not be scared to be affiliated with any political party. Instead be connected with the political system as much as possible. Use them as platforms to reach out to people rather than think of them as wardens of an ideological jail house.

Be connected to as many NGOs and Corporate houses. Build Network - Spread your idea, opinion and feeling. Do not limit yourself with diplomacy and particular set of networks or connections -

Remember main objective: To bring the social change, which can only come through spreading.

Golden Rule - 'Use any resource as long they do not hurt anyone'

Don't be scared of losing your identity. One of the biggest problem most NGOs face is the restriction of growth due to insecurity of losing their own name. Many don't co-operate with each other due to that.

It is important to remember that it is about bringing social change, not creating a revolutionary product. Forget the credits. Bring the change and the recognition will come when you really deserve it.

India Redefined had organised an event on 14 April 2010. J & K State Coordinator of India Redefined Mr Mahesh Kaul took this initiative ,To create an awareness about the pollution level in RIVER TAWI-THE LIFE LINE OF JAMMU INDIA REDEFINED ORGANISED A SENSITISATION PROGRAMMEE IN THE RIVER TAWI ,TAWI BRIDGE BIKRAM CHOWK,JAMMU India Redefined launched its campaign from kathua district in Jammu resgion of J&K by visiting the Hiranagar Fort ,Lakhan Pur Fort and other perpheral temples including an ancient Shiva Temple constructed by Pandavas ,The aim of this campaign was to sensitise the local people about their heritage and culture.India redefined created an awareness drive by involving the local people to preserve their heriatge as it has all India domain and the stakeholders.Emphasis was laid on the economic aspect of heritage in terms of the multiple effects of tourism.India Redefined was lead by Sunil Sharma,District Co ordinator Kathua for India Redefined.Mahesh Kaul ,state co-ordinator for India Redefined was the Resource person,Jatin Chanjotra from IIPA ,Ranjeet Sharma from Sangarsh,Inder Pal from J&K bank comprised the other team members

Political parties claim to work for 100 crore people, but if 100 crore people work for Redefining India - what can stop us from becoming the most powerful country.. Supporters of IR came forward with a common cause of creating India Redefined as the strongest platform to empower citizens, we really can have INDIA of our dreams. It is a social movement which is more about awareness, responsibility and ownership by all of us.

Before we Indians start demanding what government can do for us, we should start thinking what we can do for our country.

Political Parties ask for Votes from common people, India Redefined is asking for only Support, because it is citizen's movement and not a political party. Put all your goodness on one platform - India Redefined, become the strongest citizen group & make public officials accountable by ensuring better governance, infrastructure and killing the corruption.

Every Doer like Social Workers, Social Reformers, Government, Politicians, NGOs, Corporate, Activists, Benefits the Society, Countries, Globe, who attempts to make more and more Beneficiaries can become part of INDIA Redefined which aims to make more Doers than Beneficiaries .

Many Intellectuals and Entrepreneurs have already added to the vision of INDIA Redefined, for which INDIA Redefined is greatly indebted ,who are associated with many leading organizations . Their inability to work regularly with INDIA Redefined doesn't mean that they are no longer an asset for country's development.

Some of them have already shared with us their vision, passion, commitment but differ on the route being taken sometimes. Their belief in being focused and developing organization from the bottom up where as INDIA Redefined is into many things simultaneously and working from top to bottom and also sometimes bottom upwards. This difference between our approaches is another contribution in INDIA Redefined vision.

Please read What Visionary says, Read Message of INDIA Redefined & Speeches Of INDIA Redefined.

INDIA Redefined will never work on one project at one time, but a vast canvas with people with different visions, leadership qualities, associating with organizations, bringing people with similar vision under one banner.

We always keep some time things very flexible in INDIA Redefined, so that we may change rules, for the betterment of INDIA Redefined, as more suggestions come.

Students are suggesting to start Groups with similar Subjects or Study areas as Engineering, Medical, BA, B Com, MBA etc etc.

Aspirants of Youth Coordinators in various Universities, Cities,, States, have to interact on youth4change@indiaredefined.org

Work Profiles of All India Youth Coordinators, State Youth Coordinators , University Coordinators are governed by their studies taking priority.

Nomenclatures for any of the designations for any of the wings and committees are subject to change in future. So State Coordinators or Wing Coordinators can be named "Member, State Coordination Team" , or "Member, Wing Coordination Team" just as an example.

INDIA Redefined needs a Team of 4 National Coordinators of each wing, and each member of this team will have to write the work profiles for themselves with their own vision and for their own wing as they have their experience and expertise in their own profession. Then we will combine the work profiles written by all 4 Coordinators of that wing and make the final work profile of that wing, but individual work profiles of all 4 Coordinators of each wing will be different as each one will have their own vision but it should align with INDIA Redefine's vision-Mission.

The appointment letter is usually sent after receiving Coordinator's version of work profile of the coordinator position of each wing and their wing's work profile they have to write their own work profiles also what you plan to in terms of various activities and initiatives on behalf of your wing in next 12 months. As told earlier, every wing will have 3 other coordinators beside you.

Work Profile is only one year activities of Coordinators, written by Coordinators only, every year and in every State, City, Village or Wings there are 4 Coordinators who make their own Team. The first Coordinator helps to find other 3 and the Team of Coordinators form Wings in each State, City /Village.

Coordinators term will for a period of one year, which can further be extended to another year. Each appointment will be subject to confirmation after a period of six months during which Coordinator's performance and initiative will be assessed. Your duties as Coordinator of should be detailed in a separate document, which can be updated or modified during the course of your tenure.

Apart from above mentioned Coordinators, INDIA Redefined also needs National Coordinators, State Coordinators, City Coordinators, District Coordinators, Village Coordinators for Different Wings of India Redefined

These Wings of India Redefined were made according to professions of people. INDIA Redefined needs Wing Coordinators too, who will have to write the work profiles for themselves and for their wings as they have their experience and expertise in their own profession. New wings can be added as more suggestions come.

We often keep things very flexible in INDIA Redefined, so that we may change rules, and make it better as more suggestions come. An example of this is that Initially we had decided that the INDIA Redefined Central Committee will be called INDIA Redefined Core Committee, or INDIA Redefined Core team

But we have decided to change this name "Core Committee, or Core team" to INDIA Redefined Central Committee.

Many suggestions have come from people from other professions who are comfortable to work with similar professionals to start many other wings e.g. People from Finance backgrounds or Bankers. Please suggest more names if anyone wants to start any other wing which will benefit INDIA Redefined.

Many Senior people from other sectors like Media, Police, NGOs, Bureaucrats, IT, Government, Judges, Lawyers, Corporate, Defence, UN, Doctors, Rotary, Lions, Lioness etc across the globe have shown their interests many times either to support INDIA Redefined or to be partners of India

Redefined ,to get more hands and more brains from the INDIA Redefined platform because these sectors were as such working for common people.

Many Students in different Universities across India including Law Students did INDIA Redefined Internship, for which they got Certificates too. Community Leadership Program, March for Happy India sending, regular monthly reports, in a very organized way.

.I will say people People from all strata from different backgrounds ,different religion, from different social class, having different outlooks and opinions, even from different countries have supported this idea of redefining India. College Professors, Principals, Defence people, Students, RTI people, Corporate, NGOs, Police people, Politicians, Judges, Bureaucrats, NRIs, Lawyers, art of living, Media are trying to put their goodness in this movement

Some of the past projects of INDIA Redefined

- 1) "I Care"
- 2) " Youth Campaign - Clean, Green, United Peaceful India "

Some of the future projects of INDIA Redefined

1. "Educate India"
2. "Develop your own village"
3. "Cure India"
4. "Youth Campaign-Clean, Green, United, Peaceful India".

INDIA Redefined Interviews and Speeches, Events in near future are

- On 19th Nov 2011 in Kolkata- INDIA Redefined 5 Team Members will be interviewed for one hour on a Kolkata TV channel
- On 3rd Dec 2011 in Bangalore -SHINE Group Collaboration with INDIA Redefined Movement and Empowerment projects in India are launched which is an Initiative of INDIA Redefined Entrepreneurial Initiative Group (EIG) with INDIA Redefined Leaders who want to be present in this Program on 3rd Dec in Bangalore and Founder Ranjana Kanti's Speech.
- Though dates and program is not finalized but some of the INDIA Redefined Supporters may join Shine Group in a tour of some Kanyakumari Villages, where INDIA Redefined plans to make some Village Coordinators.
- In December second week in INDIA Redefined members of Navi Mumbai-which also includes Washer men, House Helpers, Laborers, students, Drivers are doing an event where they are collecting discarded items like linens, cloths, shoes, Utensils, stationery, Woolens , Medicines, Books, Shoes and distributing these to 100 families from Slum Areas.
- On 23rd January 2012 in Kolkata -India Redefined Awards Event for 25 small Social Entrepreneurs (who can be villagers too), whose social works are never acknowledged from all over India. Among these 20 awards will be given to others but 5 awards will go to IR Doers, which are mostly from small places or villages. Nominations have already come. Whole event is under IR banner but sponsored by few small Corporate.

- Dr Lal Thadani who is National Coordinator of INDIA Redefined Health and Hygiene Action Group - For Doctors and Public Health has lined up 12 months events of Health Check up camps, Blood Donation camps in various States of India.

An article Anurag wrote for me , which many people appreciated On... Like minded people..... and comfort zones -

An important thought I was provoked into thinking about pointed out to me that some of the appointed coordinators do not have the background to justify, in comparison to my own history of accomplishments in social service. Firstly, some or all of us, have at some stage of our lives felt content by our own achievements (even if it was a temporary feeling) and for even smaller reasons. Our egos permit us, that sense of achievement and even give us the benefit of comparing this with lesser mortals who have not put in adequate efforts. I pose this question, as to whom do you think is in a better position to contribute - the person who has achieved something and is "content", or the person who has not tried at all? In my opinion, for the good of the nation and India Redefined, in particular, the latter brackets of people are more suitable candidates for induction, contribution and growth. A person who does not have the feeling of achievement, at least looks forward to an opportunity to accomplish something. A person who has "been there, done that" has a sense of contentment, which gives him the feeling of a comfort zone, which does not motivate a real solution finder. Another class of associations that we have been building up life long has been with "Like Minded People". We always warm up to like minded people, be it in our professional lives, personal lives, seeking friendships, in religion, caste, color, state....you name it. We find our own comfort zones to remain content. Like minded people form and participate in political parties - be it Congress or BJP or Samajwadi. Like minded people follow a particular religion - Hinduism, Islam, Sikhism, Christianity or any other. Like minded people get together to start an enterprise or business or an NGO. While it is good and even important for like minded people to come together in pursuit of an objective - we often stop respecting the other like minded people and their objectives, and sometimes even oppose the views of the others just because they belong to other group of "Like Minded People". Don't we often see that one political party opposing all that is being espoused by the other political party, irrespective of the validity or correctness of the issue or action? This is a typical example of "Like-minded thinking" of one group dividing people rather than uniting people. History is replete with examples in our nation formation, from Raja's choosing like minded people as their minions, to state's being formed on this principle....and now also being further subdivided, seeking the same lines of justification! It is time for us to think about the whole nation as a set of different-minded people, who want to do something positive to build this nation, with unity. We need to seek and build on this principle of unity in diversity. No longer can we think in terms of religion, caste, creed as divisive factors. Just because we speak same language and have similar food, does not mean people speaking a different language or having a different cuisine need to be opposed, made fun of or not respected. "Unity in Diversity" is what India is and what we should be accepting to make India a great nation to be proud of. We need to search for a commonality, goodness and unifying activities that can get us on a common platform of nation building. Let us get out of that comfort zone of being with like minded people and think of ways that can unite all of us with a common goal and agenda. The unity of our participants, should be a mind-changing and behavioral change, which can achieve a common goal. I was a person who did something for the

country and felt content about it, thinking that I had done my bit. I have seen the change in perception, after getting out of my comfort zone, in starting this movement which will take us to a newer horizon, with the combined efforts of all. Let it not be a dream shared by a few, but an effort, determined by all India Redefined participants, in driving our destiny, as a nation. Let us get out of our comfort zones.....and find not just like-minded people, but interact with all towards our brighter future with anyone irrespective of any ideology, philosophy, political, regional or religious affiliations. India Redefined asks to fulfill ISR-Individual Social Responsibility.

India is a nation of masses who many a times commonly understood to have an attitude of Chalta hia yaar, Kuch bhi Nahin Badlega, In some of the Interviews journalists, Reporters and many others asked my opinion for the reason for such a mind set in us Indians? Why we do not take things seriously?

I always answer same --We should not blame masses for such mind set. It is not their fault. Things around them are deteriorating. Majority were always like this, with negative thinking. If they don't see quick results, they lose hope, they criticize the people who put efforts. But still you look at history- changes came. At INDIA redefined also many people must be laughing. But still I give value to those hundreds of supporters who encourage everyday. We all talk of various problems in India while we are at home, on Facebook walls, in our offices, LinkedIn, etc. - but do very little. Part of the reason is that we think that solving these are responsibility of the government, politicians, bureaucracy, economists or NGO's. Anyone but us!

I am sure things will change .

A country which was slave for 400 years, where even kings and queens had accepted slavery--still independence came. Today majority are born in independent INDIA.

India Redefined draws its inspiration from Gandhian Movement methods which was a revolution focused on independence. It was also about specific actions like non-cooperation by citizens. We are just trying to apply many Gandhiji's principles' in this era, in this society and during these times. Maybe in a different flavor! Maybe the context is different! Maybe it's a different world! But the goal is same! He also wanted India a better place to live in.

We know that these things don't happen overnight and it will take many-many years to make this happen. We are looking forward to working with many of you in next many years. Without your support, it won't be possible.

In the end, I also want to acknowledge the support of families and friends of all the India redefined members! It includes my friends and family also! Thank you for your constant support!

"Don't leave governance to the people who are not our representatives, don't leave Policy to the people who do not feel they are accountable to us, and don't leave all the other problems like literacy, slums, environment etc to NGOs and social workers who struggle without Citizen's support."

So let's make this Movement INDIA Redefined Way of life for future generations who arrive on this Planet Earth.

So let us be together to create an Awaken India, Clean India, Green India, an Educated India, Healthy India, and Sustainable country to have a Prosperous and Happy India for ourselves and the future generation to make this Globe a better place to live in.

Let's Aim to make more Doers than Beneficiaries

That an idea worth spreading

Ranjana Kanti
